PERSONAL DETAILS

Date of Birth : 18-06-2004

Marital Status : Single

Nationality : Pakistani

Religion : Islam

Gender : Female

OBJECTIVE

Motivated MERN stack backend developer with hands on experience in building AI based health and multi domain platforms like Luna, CAB, Petronas and UFund seeking a role to contribute in scalable backend systems API development authentication JWT cookies integrations with third party services like Terra and ElevenLabs and cloud based media handling using Cloudinary while further enhancing skills in full stack and AI driven applications

EDUCATION

Bachelor of Science in Computer Science 2025

University of the Punjab

3.24

Intermediate 2021

Government degree college Gujranwala

932

Matric 2019

Government girls high school

959

EXPERIENCE

Backed Developer 14/09/25 - Continues

Growmify

I completed an internship at this company as a

Backend Developer

Built MERN backend for multiple projects including

Luna AI health platform, Petrona's, CAB and UFund

with integrations like Terra wearable API and

ElevenLabs voice AI for chat and call features

implemented JWT authentication authorization

cookies email notifications and Cloudinary for media

handling and also worked on template based email

systems

Frontend developer 14/06/25 - 12/09/25

Growmify

I gained experience in frontend development, where I

built projects using HTML, CSS, JavaScript,

Bootstrap, and Tailwind CSS.

ACTIVITIES

Enhance my Programming Skills

LANGUAGES

English

Urdu

Luna

Developed MERN backend for AI based health platform with wearable voice AI chatbot call agent and notification integrations

Integrated Terra wearables and ElevenLabs voice AI into backend services

Persona's MBR-2K26

Working on authentication authorization email integration and cloundinary for files and images

CAB

Worked on stripes in the CAB project, send emails for high orders and hide strips payment and show the stripe for low orders, then add the module in the admin panel and integrate API and design UI.

Zeolit

Developed a Full-stack drop shipping e-commerce platform with Next.js, Node.js, Express and MongoDB. Worked on a customer storefront, Admin Dashboard,, authentication, product/category management, card and stripe checkout, Ingram micro supplier integration, automated inventory/price synchronization, order and fulfilment management, commission, email templates, search, filtering and dashboard analytics.

UFund

Working on email template and RESTFUL API's in a project

Gesture control

Developed AI based gesture control project that use hand moments in the Air to control the volume allowing it to be increased or decreased through hands gesture

Swift Services

I developed my final year project using Android studio

ACHIEVEMENTS & AWARDS

Certificate of participation in divisional science exhibition
